Public Meeting - All are welcome
Monday, November 16, 2020 at 7:00 pm

I. Call meeting to order
II. Introductions & Announcements (see notices from DDOT at end)
III. Community Comment (5 minutes)
IV. Old Business
   A. None at this time.
V. New Business
   A. Parking issues at Maury ES related to BZA 20323. The size of the existing school parking lot will be reduced from 21 to 13 spaces to create more play space at the school, in response to school-community requests. Per an agreement between District of Columbia Public Schools (DCPS) and District Department of Transportation (DDOT), DDOT has agreed to locate 8 street parking spaces adjacent to the school on 12th Place NE, to be used by school staff during DCPS work hours via ParkMobile app. Outside DCPS work hours, the spaces could operate as Residential Permit Parking (RPP) zone or pay-by-cell parking open for use by the public. These spaces are already designated as “no parking during school hours”. This is consistent with prior ANC votes on the matter. Link to additional information:
      Some concerns noted by residents include:
      • The calculation for the cost for the use of the Parking APP may be incorrect - possibly $648 per year rather than $3,240 per year.
      • Remind DDOT of prior request for ROP on west side of 12th Pl. and RPP from 6 pm - 7 am on east side
   B. Public Space application #343819, for driveway through public space at 1518 North Carolina Ave. NE. This application was originally by the ANC earlier this year. Letter of opposition dated 3/3/2020 is posted at https://anc6a.org/wp-content/uploads/ANC6A-Re-Public-Space-343819-1518-North-Carolina-NE.pdf
   C. Additional public space applications if received prior to the meeting.
   D. Discussion of whether to create a coordinated list of ANC 6A paving priorities (per PaveDC) and, if so, how should the list be developed.

VI. Community Comment (time permitting)
VII. Adjourn meeting

Updates from DDOT

Traffic Safety Requests:

DDOT has already been working on a traffic safety assessment for D Street NE between approximately 16th Street and 18th Street. DDOT has committed to: install new high-visibility crosswalks at the intersection of 16th Street and D Street NE and new 20 MPH signs (replacing 25 MPH) along D Street NE.

ANC 6A passed a resolution in support of speed humps on the blocks, which DDOT was willing to install until they encountered some problems when doing initial field work. The 1600 block and the 1700 block are too short to install traditional midblock speed humps. Instead, we are investigating the feasibility of installing raised crosswalks (essentially a speed hump at a crosswalk, not midblock) at the intersection of 17th/D and 18th/D NE. Because of the presence of a WMATA bus route and several manhole covers in these crosswalks, coordination with WMATA and utility companies will take some time to work out before DDOT can confirm an installation plan.

PaveDC feedback requested:

(DDOT) had another record roadway resurfacing season. This calendar year, so far, they have paved over 125 miles of roadway across all eight wards of the District. DDOT is in the early stages of planning for the 2021 paving season and wants your feedback on our roadway resurfacing efforts. Every year they determine which roads to pave based on a number of factors including budget, engineering assessments, and 311 Service Requests. In addition, we consider community feedback.

Mayor Bowser is committed to eliminating all roadways, alleys, and sidewalks in poor condition in Washington, DC by 2024 through the PaveDC initiative. Each year, beginning in the spring and continuing through the fall, DDOT performs annual routine street maintenance to keep the District’s roadways as close as possible to a newly constructed condition. If you’d like to see our progress, check out the annual paving plan using the interactive tool, PaveDC at ddot.dc.gov/pavedc. DDOT plans to enhance the tool in 2021 to make it more informative. Please always encourage your neighbors and friends to submit service requests via 311 for locations that require our attention.
